

Supplementary Material

On the Distillation Loss Functions of Speech VAE for Unified Reconstruction, Understanding, and Generation

1 Scores of Different Methods

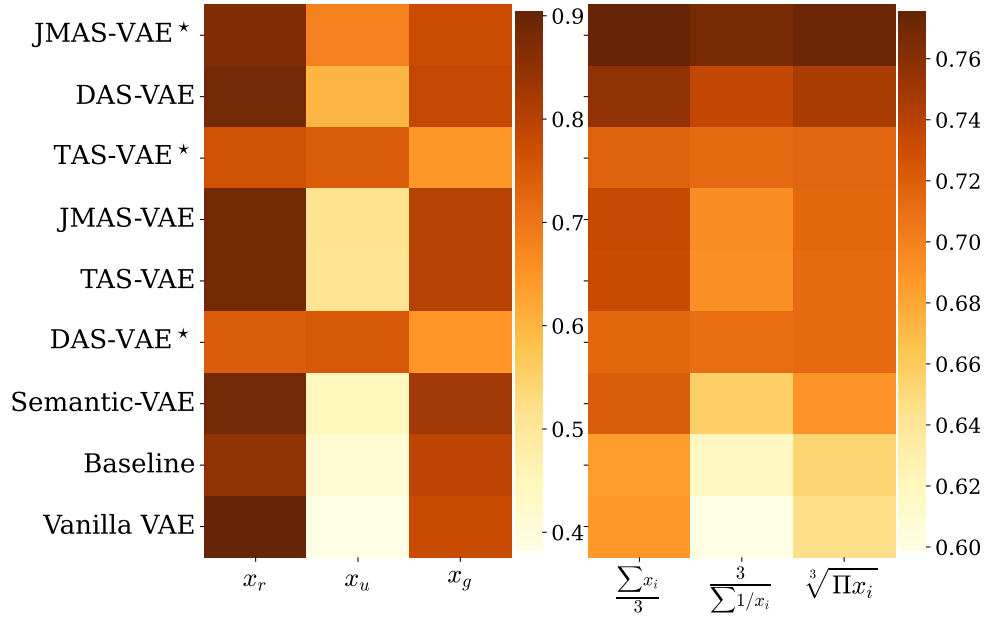

Figure 1: **Reconstruction, understanding, generation and overall scores of different distillation methods.** x_r , x_u , and x_g denote reconstruction, understanding, and generation scores, respectively. The three columns of data on the right represent the total scores calculated using the arithmetic mean, harmonic mean, and geometric mean, respectively ($i = r, u, g$).
